## RESEARCH INTEREST AND VISION

---

Today's networked systems perform well most of the time, but not all the time. A key reason for this is that they use heuristics whose behavior is poorly understood. I use automated reasoning in new ways to augment human ability to understand the behavior of widely deployed heuristics. My tools prove performance properties of network heuristics and uncover unexpected ways in which they fail in the real world. I have applied this technique to many areas with the bulk of my work focusing on congestion control. Going forward, I will use this approach to design systems that are provably performant and robust.

## EDUCATION

---

**Massachusetts Institute of Technology (MIT)** 2019-2023

Ph.D. Dept. of EECS

Advisors: Hari Balakrishnan and Mohammad Alizadeh

**Massachusetts Institute of Technology (MIT)** 2017-2019

Master of Science, Dept. of EECS

Advisors: Hari Balakrishnan and Mohammad Alizadeh

**Indian Institute of Technology Guwahati (IIT-G)** 2013-2017

B.Tech. in Computer Science & Engineering

*President of India Gold Medal*

## INDUSTRY IMPACT

---

1. Meta uses my congestion control algorithm (CCA), Copa [], for live video uploads
2. Meta uses a my modification to BBR [] (a CCA designed by Google) for a vast majority of their user-facing traffic

## HONORS AND AWARDS

---

- MIT EECS G. M. Sprowls PhD Thesis Award in Computer Science (2024)
- ACM SIGCOMM Doctoral Dissertation Award Runner-Up (2024)
- Marconi Society Young Scholar Award (2023)
- ACM SIGCOMM best student paper award (2022)
- ACM SIGCOMM best paper award (2017)
- MIT Jacobs Presidential Fellowship (2017)
- President of India Gold Medal - IIT Guwahati (2017)
- KVPY Government of India Scholarship (2013)
